

PRESENTATION OF CONSORTEX PROJECT

PRESENTED BY VICTOR LEJARRETA, PROJECT COORDINATOR

BILBAO (Spain), March 30th 2021

SHIPBUILDING IN BASQUE COUNTRY

Cristobal Colón dredger (largest in the World) leaving Bilbao shipyards.

THE PARTNERSHIP

LEAD PARTNER

OVERALL OBJECTIVE

The main aim of this project was to form several consortia or collaboration networks of European interregional companies specialized

- in the manufacture of certain sets of maritime production: vessel design, bridge, engine room, deck and accommodation
- for a certain type of shipbuilding: offshore vessels, marine power plants, cruise ships and scientific vessels.

EXPECTED MEDIUM & LONG TERM EFFECTS

- A greater presence of participant ancillary shipbuilding industry companies in international markets, minimizing the effect of strong international competition from Asian companies.
- A change in the way of working of participant firms. They are getting used to work in collaboration with other companies in highly internationalized and high tech environments.
- An increase in employment security, professional training and qualification of workers.
